Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: The applicant explained the invention emphasizing the differences between their invention and the prior art. The main difference being that in the applicant's invention the phage are replicated in situ and not removed from the ligand before replication occurs. The applicant suggested some claim amendments which the examiner believed would overcome the prior art rejections in which the amendment make explicit that which was implicit in Claim 23. The applicant agreed to present these amendments in their amendment due before the end of DEC 03 and to argue why therein these new limitations make the claims allowable over the prior art of record. .
